Academy of National Economy
Gevork Papiryan, Paul W. Beamish
Publication Date: 5/11/2005
Version Date: 10/1/2009
Teaching Note: 8B05M42

In 1989, the government of the USSR appointed Academician Abel Aganbegyan to the Academy of National Economy as rector. Since its foundation by the Soviet government in 1977, this educational institution educated several top managers for the Soviet economy. Since 1992, after the collapse of the Soviet Union and the start of democratic reforms, the Academy started its own transformation to the business university. The Academy is in the process of finding a new strategy choice for its further evolution, and the school's leadership must resolve both internal and external problems and stand up to the challenge of a competitive Russian business education market. The most significant issue for the Academy's leadership during the strategy development process is to redefine its mission and status-quo. There are three basic alternatives: to continue being affiliated with the government elite state educational and scientific centre with the group of relatively independent business schools; separate from these independent schools and restate its mission as a state educational and research institution affiliated with the government; or encourage the separation of the business schools and try to transform it into a Western style business school.

Barrick Gold Corporation - Tanzania
Aloysius Newenham-Kahindi, Paul W. Beamish
Publication Date: 10/20/2010
Version Date: 09/21/2011
Teaching Note: 8B10M20

This case examines the giant Canadian mining corporation, Barrick Gold Corporation (Barrick), (called Africa Barrick Gold plc since 2009), and the way it engages in sustainable community developments that surround its mining activities in Tanzania. Following recent organized tensions and heightened criticism from local communities, media, international social lobbyists and local not-for-profit organizations (NFOs), Barrick has attempted to deal with the local communities in a responsible manner. At issue for senior management was whether there was much more that it could reasonably do to resolve the tensions.

The case considers: how MNEs seek social license and local legitimacy; the relevance of hybrid institutional infrastructures; the evolving global roles for MNEs and their subsidiaries. The case is appropriate for use in courses in international management, global corporations and society, and international development and sustainable value creation.

Beijing Mirror Corp.
Paul W. Beamish, Xiao Yue Chen, Xin Zhao
Publication Date: 11/25/1998
Version Date: 2/10/2000
Teaching Note: 8A98M33

Beijing Mirror Corporation owned the patent for a newly invented rearview mirror which eliminated the usual blind spot. At issue for the company was how to
introduce the product to both the domestic and international markets. More specifically, should the company try to commercialize the technology independently, or via joint venture? Should they do so with a local or foreign company? What pricing, promotional and distribution approaches made sense? What is their resource position relative to these decisions?

Braddock Manufacturing Maquiladora
Paul W. Beamish, Joyce Miller
Publication Date: 01/01/1991

A senior manager in a U.S. manufacturing firm must make a recommendation about whether 46 labour intensive jobs should be moved from the existing California plant to a new facility in a Mexican maquiladora. If the Mexican opportunity is pursued, decisions are also required regarding the entry mode (subcontracting, shelter operator or wholly-owned subsidiary) and location (border or interior). The case describes the origin and operation of Mexico’s maquiladora program and compares Mexico with alternative regions for investment.

Broad Air Conditioning and Environmental Protection
Zhi Yi He, Meng Sun, Paul W. Beamish
Publication Date: 06/24/2004
Version Date: 10/14/2009
Teaching Note: 8B04M34

Broad Air Conditioning is a Chinese company with a proactive environmental attitude, but suffering from deteriorating financial results. The company founder and chief executive officer must decide whether to start producing electricity powered air conditioners to improve its financial results easily or stick to its ideal and only manufacture machines powered by heat. The major theme of this case is to understand corporate social responsibility, by discussing how an enterprise can find a way to harmonize the relationship between benefitting the company and protecting the environment, especially in developing countries.

Disciplines: General Management, International

Bundy Asia Pacific - China Strategy
Paul W. Beamish, Jack Li, Nancy Wang, Steven Zuo
Publication Date: 4/20/1998
Version Date: 10/21/2002
Teaching Note: 8A98M03

Phil Stephenson, the director of China for Bundy Asia Pacific (BAP), was preoccupied with Bundy’s business in China. BAP’s CEO, Tony Martin, had shown Phil the fax from Robin Thompson, the new marketing and product development director of Bundy International, BAP’s UK-based parent company. Thompson had asked BAP about its strategy for the refrigeration business in China. Despite 10 years of experience in China, Bundy had not met its market goals. Whatever strategy was developed, it would be an important part of Bundy’s proposed global refrigeration strategy. This rich case allows detailed discussion around issues including (a) business (re)development strategy, (b) joint ventures versus wholly owned subsidiaries, (c) organizational structure, and (d) expatriate and local staffing.

9B10M091
CIBC Mellon: Managing a Cross-border Joint Venture
Paul W. Beamish, Michael Sartor
Publication Date: 11/05/2010
Teaching Note: 8B10M91

During his 10-year tenure, the president and chief executive officer (CEO) of CIBC Mellon had presided over the dramatic growth of the jointly owned, Toronto-based asset servicing business of CIBC and The Bank of New York Mellon Corporation (BNY Mellon). In mid-September 2008, the CEO was witnessing the onset of the worst financial crisis since the Great Depression. The impending collapse of several major firms threatened to impact all players in the financial services industry worldwide. Although joint ventures (JVs) were uncommon in the financial sector, the CEO believed that the CIBC Mellon JV was uniquely positioned to withstand the fallout associated with the financial crisis. Two pressing issues faced the JV’s executive management team. First, they needed to discuss how to best manage any risks confronting the JV as a consequence of the financial crisis. How could the policies and practices developed during the past decade be leveraged to sustain the JV through the broader financial crisis? Second, they needed to continue discussions regarding options for refining CIBC Mellon's strategic focus, so that the JV could emerge from the financial meltdown on even stronger footing.
This case is intended to provide an example of best practice in joint venturing. There is a school of thought within the scholarly community that suggests that JVs are less profitable than wholly owned subsidiaries, are a transitional organization form, are very hard to manage, and are a vehicle that might result in the loss of one's technology. The CIBC Mellon JV provides a counterpoint. It has been quite profitable and stable, has not resulted in BNY Mellon losing its technology contribution, and senior management has been able to effectively manage operations.

A second objective is to underscore the value in paying attention to the details in designing and managing a joint venture because, during an actual crisis, you'll surely find out whether major problems exist. Carefully considering such details greatly improves the chances that it will survive. Some joint ventures never pass such a test of their resiliency.

The case can be used in the latter half of a strategic management course, or in a course about cooperative strategies.

CIBC-Barclays: Should Their Caribbean Operations Be Merged?
Don Wood, Paul W. Beamish
Publication Date: 1/10/2005
Version Date: 10/15/2009
Teaching Note: 8B04M67

At the end of 2001, the Canadian Imperial Bank of Commerce (CIBC) and Barclays Bank PLC were in advanced negotiations regarding the potential merger of their respective retail, corporate and offshore banking operations in the Caribbean. Some members of each board wondered whether this was the best direction to take. Would the combined company be able to deliver superior returns? Would it be possible to integrate, within budget, companies that had competed with each other in the region for decades? Would either firm be better off divesting regional operations instead? Should the two firms just continue to go-it-alone with emphasis on continual improvement? A decision needed to be made within the coming week. This case may be taught on a stand alone basis or in combination with any of the six additional Cross-Enterprise cases that deal with the various functional issues associated with the actual merger: Accounting and Finance - CIBC-Barclays: Accounting for Their Merger, product 9B04B022, Information Systems - Information Systems at FirstCaribbean: Choosing a Standard Operating Environment, product 9B04E032, Marketing and Branding - FirstCaribbean International Bank: The Marketing and Branding Challenges of a Start-up, product 9B05A012, Human Resources - Harmonization of Compensation and Benefits for FirstCaribbean International Bank, product 9B04C053, Finance - FirstCaribbean Merger: The Proposed Merger, product 9B06N004, and technical note - Note on Banking in the Caribbean, product 9B05M015.

9B04M068
CQUAY Technologies Corp.
Pual W. Beamish, Kevin K. Boeh
Publication Date: 10/13/2004
Version Date: 10/15/2009
Teaching Note: 8B04M68

CQUAY Technologies Corp was a privately-held Canadian software company with offices in Toronto, Calgary and Washington, D.C. CQUAY marketed a patented location intelligence engine called Common Ground. The company's technology was designed for an emerging, multi-billion dollar segment of the spatial information management market. A year earlier, the board had asked the chief executive officer to shape the company into an acquisition target over the next 18 to 24 months. A year later there were no imminent acquisition discussions, and recent customer traction and the sales pipeline seemed to merit raising growth

9A98G004
CIBC Wood Gundy in Asia: An Evolving Regional Strategy
Paul W. Beamish, Bruce Moore
Publication Date: 3/4/1998
Version Date: 2/10/2000
Teaching Note: 8A98G04

The Singapore-based managing director of Origination and Structuring for CIBC CEF pondered how expansion opportunities in Asia fit with the firm's Asia-Pacific strategy and what his recommendation would be at the monthly senior management meeting regarding the Canadian investment bank's expansion into Malaysia. The firm has existing Asian operations in Australia, China, Hong Kong, Japan, Singapore and Taiwan. From the perspective of the managing director, a decision is required regarding whether the company should locate at all in Malaysia, and if so, which city and how to staff it.

capital instead of following the acquisition-focused plan. The CEO wanted to keep his stockholders and board happy by executing the plan they had given him, but did not want to jeopardize possible customer growth. If he refocused the plan, he feared it might change acquisition opportunities. Without further contracts, the existing cash would sustain the company for only another six to eight months. The CEO thought the most likely outcome was to sell the company, but he needed to make the company more attractive. He planned to present options and a recommendation to the board of directors later that month.

9B06M015

**Cameron Auto Parts (A) - Revised**
**Harold Crookell, Paul W. Beamish**
Publication Date: 1/11/2006

**Teaching Note:** 8B06M15

This case is about a small American auto parts producer trying to diversify his way out of dependence on the major automakers. A promising new product is developed and the company gets a chance to license it to a Scottish manufacturer. The issue of whether to license or go it alone in international markets is central to the case. (A sequel to this case is available titled Cameron Auto Parts (B) - Revised, case 9B06M016.)

**Canadian Solar**
**Paul W. Beamish, Jordan Mitchell**
Publication Date: 04/05/2010

**Version Date:** 09/21/2011

**Teaching Note:** 8B10M19

In late September 2009, the CEO of the Nasdaq-traded solar cell and module manufacturer, Canadian Solar, was at an inflection point in the formation of its international strategy. The company had experienced dynamic growth during the past five years buoyed largely by aggressive incentive schemes to install solar photovoltaic (PV) technology in Germany and Spain. The credit crunch, coupled with changes in government incentive programs, caused a major decline in the demand for solar PV technology and analysts were predicting that full year 2009 sales would decline. Furthermore, competition in the industry was fierce with diverse players ranging from Japanese electronic giants to low-cost Chinese producers. Canadian Solar had decided to focus on 10 major markets in the next two to three years where strong renewable policies existed. Students are challenged with deciding if any changes to the company's global strategy are necessary.

Carrefour China, Building a Greener Store
Andreas Schotter, Paul W. Beamish, Robert Klassen
Publication Date: 5/9/2008
Version Date: 8/26/2008
Teaching Note: 8B08M048

Carrefour, the second largest retailer in the world, had just announced that it would open its first “Green Store” in Beijing before the 2008 Olympic Games. David Monaco, asset and construction director of Carrefour China, had little experience with green building, and was struggling with how to translate that announcement from ecological and economic perspectives. In addition, he must take the regulatory and infrastructure situation in China into account, where no official green building standard exists and only few suppliers of energy saving equipment operate. He had already collected energy and cost data from several suppliers, and wondered how this could be used to decide among environmental technology options. Given that at least 150 additional company stores were scheduled for opening or renovation during the next three years in China, the project would have long term implications for Carrefour.

Chabros International Group: A World of Wood
Paul W. Beamish, Bassam Farah
Publication Date: 11/30/2010
Version Date: 03/19/2012 (Data)
Teaching Note: 8B10M100

The Chabros International Group case examines how a Lebanese multinational wood company confronts a drastic drop in its largest subsidiary’s sales after 2008’s global economic crisis. Antoine Chami, Chabros’s owner and president, was reviewing his company’s 2009 end-of-year financial statements and, in particular, a 30 per cent drop in sales in Dubai. In 2007, a year before the global economic crisis, Chami had invested more than $11 million to acquire and expand a sawmill in Serbia to meet Chabros’s growing lumber sales demand. With a much higher capacity to produce lumber and a much lower probability to sell it, Chami had to decide what to do to overcome this challenge. Should he close parts of his Serbian sawmill? Should he try to boost his company’s sales to use all of his sawmill’s available capacity? If so, should Chabros try to increase sales within the countries where it already operated (UAE, Saudi Arabia, Qatar, Oman, Egypt) or should it expand into a new country (Algeria, Bahrain, Iran, Iraq, Jordan, Kuwait, Libya, Syria, Tunisia)? Would Morocco, among other countries, be the best country to expand into? Was it the right time to embark on such an expansion?

Disciplines: Entrepreneurship, General Management/Strategy, International

9B03M004

China Kelon Group (A): Diversify or Not?
Paul W. Beamish, Justin Tan
Publication Date: 2/27/2003
Version Date: 10/21/2009
Teaching Note: 8B03M04

In 1998 the soon-to-retire founder of China Kelon Group, a major home electrical appliance manufacturer, was confronting issues of market diversification (urban to rural), product diversification (refrigerator to now also produce air conditioners), and the evolution of his senior management team (from an entrepreneurial firm to one managed by professional manager). Besides offering a context to address the above issues, this case illustrates to a non-Chinese audience just how rapidly local Chinese manufacturing has developed, and that such firms are future competitors for foreign companies. It also helps students explore the broader question about the ability of founder/entrepreneurs to effectively manage the transition to becoming a larger, more diversified company. Supplement to this case is China Kelon Group (B): Integration After Merger, product number 9B03M005.

Disciplines: General Management, International
Issue(s): Diversification, Environmental Change, Strategic Change, Emerging Markets
Industry: Electric & Electronic Equipment Supplies
Setting: China, Large organization, 1998
Difficulty: 4 - Undergraduate/MBA
Length: 7 pages

9B03M005

China Kelon Group (B): Integration After Merger
Paul W. Beamish, Justin Tan
Publication Date: 2/27/2003
Version Date: 10/21/2009
Teaching Note: 8B03M05

This supplement to China Kelon (A): Diversify or Not, product number 9B03M004, deals with the issue of integrating two large business groups after the Number 6 air conditioner manufacturer, Kelon Group, acquired the Number 5 air conditioner producer, Huabao. While Kelon Group is a non-state owned company, Huabao was spun off from a state owned enterprise group. It was a landmark acquisition case in which a non-state entrepreneurial firm took over a state enterprise that had strong name brand and national reputation. The two companies have different resource bases, history, tradition, corporate culture, management style, product
features and reward systems. They were traditionally close rivals located in the same township. The two companies exhibit potential for synergy and the combined capacity will put the new Kelon-Huabao as the top air conditioner manufacturer in terms of market share. However, this outcome depends on a successful merger and integration.

**Chinese Fireworks Industry - Revised**

*Paul W. Beamish*

Publication Date: 01/11/2011

Version Date: 09/21/2011

**Teaching Note:** 8B11M006

The Chinese fireworks industry thrived after China adopted the open door policy in the late 1970s, and grew to make up 90 per cent of the world's fireworks export sales. However, starting from the mid-1990s, safety concerns led governments both in China and abroad to set up stricter regulations. At the same time, there was rapid growth in the number of small family-run fireworks workshops, whose relentless price-cutting drove down profit margins. Students are asked to undertake an industry analysis, estimate the industry attractiveness, and propose possible ways to improve the industry attractiveness from an individual investor's point of view. Jerry Yu is an American-born Chinese in New York who has been invited to buy a fireworks factory in Liuyang, Hunan.

**Euro-Air (A)**

*Paul W. Beamish*

Publication Date: 6/24/1999

Version Date: 1/17/2000

**Teaching Note:** 8A99M15

A North America-based representative of a major European airline has just received a letter from an unhappy customer detailing a very large number of service problems. A quick check had revealed that this premium-paying customer's complaints were all valid. A meeting is planned with the customer. Before this, the airline representative must decide (A) what to say in response, and (B) what, if any, compensation should be offered. Internally, there was a need (C) to resolve what their organization should learn from this experience, both from a subsidiary and parent company perspective, and the implications on their participation in the "Crown Alliance". This case raises many important questions regarding service recovery, communications, and non-equity alliances.

**First Fidelity Bancorporation (A)**

*Paul W. Beamish, Barbara L. Marcolin, Kerry McLellan*

Publication Date: 1/21/1993

Version Date: 12/24/2002

**Teaching Note:** 8A92M17

First Fidelity Bancorporation, a holding company for eight independent banks in the New Jersey and Pennsylvania areas, was going through a major restructuring and rationalization in response to serious financial problems, threats of regulatory control and changing market demands. In this reorganization, the head of corporate operations and systems was considering ways to facilitate the restructuring. He was seriously considering outsourcing as an alternative way to manage the internal information systems. The case explores the simple economics behind an outsourcing strategy and the complicated technical, political and cultural rationalization of a hierarchical, independent organization into a centrally-managed operation. Follow-up cases (8A93E005, 8A93E006) are available.

**Disciplines:** General Management

**First Fidelity Bancorporation (B): Selecting an Outsourcing Vendor**

*Paul W. Beamish, Kerry McLellan, Barbara L. Marcolin*

Publication Date: 7/7/1993

Version Date: 3/8/2002
First Fidelity Bancorporation had decided to use an outsourcing vendor to convert its existing information systems operations into a centralized facility and to operate the systems on a long-term basis. This decision was part of a rationalization process to consolidate eight independent banks into one operating structure so as to achieve cost savings and create a way of integrating new acquisitions and mergers. The holding company had to select an outsourcing vendor that could participate in this process and achieve the growth objectives set by the bank. The options were to select a partner or a supplier. A background case (9A92M017) is available.

First Fidelity Bancorporation (C): Managing an Outsourcing Relationship With EDS
Paul W. Beamish, Kerry McLellan, Barbara L. Marcolin
Publication Date: 7/7/1993
Version Date: 3/8/2002
Teaching Note: 8A9ZM17

First Fidelity Bancorporation had outsourced its information systems conversion and on-going data centre management to Electronic Data Systems (EDS) on a ten-year contract. The EDS-FFB relationship was one year into the arrangement (1991) when several challenges had surfaced, the most urgent of which was an $8 million cost overrun on the conversion project. The EDS account manager had the choice of absorbing the costs, seeking compensation from the bank or suggesting a compromise. Several other challenges would also have to be addressed in the relationship, such as an incompatible software platform, resistance, difficult communications and flexibility to accommodate future bank directions and acquisitions. Background cases (9A93E005, 9A92M017) are available.

General Motors Defense
Paul W. Beamish, Changwha Chung
Publication Date: 2/6/2003
Version Date: 10/21/2009
Teaching Note: 8B03M02

General Motors Defense, a division of General Motors, one of the world’s largest automobile manufacturers, designs and manufactures military vehicles. The company is approached by General Dynamics to jointly pursue the U.S. Army’s Brigade Combat Team program. However, General Dynamics made it clear that they would also submit a bid on their own. Contrary to past practices, the chief of staff of the U.S. Army planned to award the multi-billion dollar contract within only 11 months. The executive director of General Motors Defense has to decide whether the company should bid it alone or submit a joint venture bid with General Dynamics.

Giant Inc.: Formation of the A-Team
Chwo-Ming (Joseph) Yu, Paul W. Beamish
Publication Date: 5/25/2009
Teaching Note: 8B09M44

This case describes the history and activities of the A-Team, a major alliance of bicycle assembly firms and parts suppliers in Taiwan, which was created in 2003. A strategic alliance with competitors posed challenges. For the A-Team, it was more complicated because the alliance was between two competing bicycle assembly firms and between parts suppliers. By 2006, progress had been made in making the alliance work but the senior executives were wondering what they could do to ensure future progress. The case can be used in a strategy module or course on alliances/joint ventures in...
a section examining the competition versus cooperation challenge.

Global Branding of Stella Artois
Paul W. Beamish, Anthony Goerzen
Publication Date: 10/19/2000
Version Date: 8/29/2006
Teaching Note: 8B00A19

Interbrew had developed into the world's fourth largest brewer by acquiring and managing a large portfolio of national and regional beer brands in markets around the world. Recently, senior management had decided to develop one of their premium beers, Stella Artois, as a global brand. The early stages of Interbrew's global branding strategy and tactics are examined, enabling students to consider these concepts in the context of a fragmented but consolidating industry. It is suitable for use in courses in consumer marketing, international marketing and international business.

Human Resource Management in Multinational Banks in Tanzania
Paul W. Beamish, Aloysius Newenham-Kahindi
Publication Date: 10/30/2007
Teaching Note: 8B07C40

The case examines how the best practices of two banks were organized and managed to provide financial services to a small niche of foreign customers in the mining, tourism and construction sectors in Tanzania. The two banks claimed to be similar in many ways. They both were from countries whose economies were run broadly on neo-liberal lines, in that there was little state intervention in either economy, however, differences existed with respect to how they managed their operations. The case is ideally suited to illustrate the on-going tension and different types of best practices in cross-market integration. It provides opportunities to explore the challenges faced by multinational company banks in managing globalworkforces, the evolution of the banking sector, and the
influence of technology in shaping work in organizations.

**ING Insurance Asia/Pacific**

*Rod E. White, Paul W. Beamish, Andreas Schotter*

Publication Date: 1/9/2007

**Teaching Note:** 8B06M083

The new chief executive officer (CEO) of ING Insurance Asia/Pacific wants to improve the regional operation of the company. ING Group was a global financial services company of Dutch origin with more than 150 years of experience. As part of ING International, ING Insurance Asia/Pacific was responsible for life insurance and asset/wealth management activities throughout the region. The company was doing well, but the new CEO believed that there were still important strategic and operational improvements possible. This case can be used to discuss the “local versus regional or global” management issue and will yield best results if the class has already been introduced to different strategic and organizational alternatives in the international business context.

**Kanzen Berhad: A Proposed Joint Venture With Pacific Dunlop Limited**

Donald J. Lecraw, Paul W. Beamish, Boon Lim

Publication Date: 6/24/1997

Version Date: 10/18/2002

**Teaching Note:** 8A97G04

The director of Kanzen Berhad (KB), Malaysia, must decide whether to recommend the company's owner and CEO accept the offer of Pacific Dunlop Limited to form a joint venture in which Pacific Dunlop, an Australian company, would buy 30 per cent of KB's holdings in six subsidiaries in the mattress and bedding industry for RM$28 million. Since its founding as Dreamland, KB had been growing rapidly and had been quite profitable. The owner, however, had plans for expansion into other businesses in Malaysia and, especially, in China. As well, Pac...
The founder of Kids Market Consulting, a market research firm dedicated to the kids, tweens and teens segment, was faced with increasing competition and slowing revenue, and was exploring a variety of possibilities for the future strategic direction of the business. In particular, she had to formulate the best plan for protecting the niche market and decide how aggressively to pursue expansion. In addition, there was the existing relationship with her business partner, and Kids Market Consulting was part of his group of marketing firms. Any changes the founder chose had to respect this relationship and she was therefore restricted to a limited number of options. The overarching corporate objective for the company was to defend the market from larger businesses who were trying to increase their share of the market research industry.

In 2005, the vice-president of Lundbeck, a Danish based central nervous system (CNS) pharmaceutical firm, needed to decide what to do with one of its most promising subsidiaries, Lundbeck Korea. Over its short lifetime, under the leadership of the country manager and the Asia regional manager, the subsidiary had grown well beyond the original goals set for it. The vice-president wanted to create a reporting structure and management mix that would balance the local demands that Lundbeck Korea required for growth with Lundbeck’s overall strategy of specialization, speed, integration and results. While focusing on Lundbeck Korea, the case also traces Lundbeck’s internationalization efforts in Asia over the past 20 years. Over that time, the company has grown from pure licensing arrangements to establishing its own country level subsidiaries. This case introduces the dynamic tensions between taking advantage of local management expertise and executing a corporate strategy developed for an entire global group. In addition, it illustrates the importance, but difficulties, of being sensitive to local management goals, while promoting a global corporate culture.

Mabuchi Motor Co., Ltd.
Paul W. Beamish, Anthony Goerzen
Publication Date: 10/30/1998
Version Date: 2/11/2000
Teaching Note: 8A98M34

A year had elapsed since Mabuchi Motor Co., Ltd. of Japan, the world’s most successful producer of small electric motors, had implemented a new management training program at one of its foreign operations in China. The program had two objectives. First, it was intended to enable the corporation to maintain its strategy of cost minimization by making it possible to reduce Japanese expatriate levels by improving the management skills of local managers in foreign subsidiaries. Second, by overcoming the shortage of qualified Japanese managers, the program would also allow the continued aggressive expansion of production that had become a cornerstone of corporate strategy. The teaching purpose is to illustrate the difficulties associated with transferring a management style and corporate culture into a different national culture.

MapQuest
Paul W. Beamish, Kevin K. Boeh
Publication Date: 9/20/2004
Version Date: 9/18/2008
Teaching Note: 8B04M44

MapQuest is a leading provider of mapping services and destination information as well as a publisher of maps, atlases and other guides. On the Internet, they provide these products and services both to consumers directly and to other businesses enabling these businesses to provide location, mapping and destination information to their own customers. The company completed a successful initial public offering five years ago and were in a strong competitive position. However, the markets were allowing competitors to quickly get funding in both private and public deals. As well, there were perceptions that a general stock market bubble existed for technology companies. The chief executive officer had several options available, and wanted to consider those options and present a recommendation to the board. Possible options included splitting the firm's old and new-line business units, raising capital to fund an acquisition strategy, forging a set of alliances, focusing on organic growth, and pursuing the sale of the firm.

Mattel and the Toy Recalls (A)
Hari Bapuj, Paul W. Beamish
Publication Date: 2/21/2008
Version Date: 12/21/2009
Teaching Note: 8B08M10

On July 30, 2007 the senior executive team of Mattel under the leadership of Bob Eckert, chief executive officer, received reports that the surface paint on the Sarge Cars, made in China, contained lead in excess of U.S. federal regulations. It was certainly not good news for Mattel, which was about to recall 967,000 other Chinese-made children’s character toys because of excess lead in the paint. Not surprisingly, the decision ahead was not only about whether to recall the Sarge Cars and other toys that might be unsafe, but also how to deal with the recall situation. The (A) case details the events leading up to the recall and highlights the difficulties a multinational enterprise faces in managing global operations. Use with Ivey case 9B08M011, Mattel and the Toy Recalls (B).

9B08M011
Mattel and the Toy Recalls (B)
Hari Bapuj, Paul W. Beamish
Publication Date: 2/25/2008
Teaching Note: 8B08M11

On August 14, 2007, the U.S. Consumer Product Safety Commission (CPSC) in cooperation with Mattel announced five different recalls of Mattel’s toys. On September 4, Mattel announced three more recalls. Some were due to the use of lead paint, while others were due to small magnets coming loose. The (B) case outlines the handling of the recalls and its consequences, such as consumer outrage, media scrutiny, government intervention, and the effect on China. Further, it discusses the design flaws for which large toy companies are responsible. The (B) case raises many issues, such as who Mattel’s stakeholders are, what values Mattel followed, and whether Mattel needs to revisit its China strategy. Use with Ivey product, 9B08M010, Mattel and the Toy Recalls (A).

**Note on the Cuban Cigar Industry**

*Paul W. Beamish, Akash Kapoor*

Publication Date: 2/27/2003

Version Date: 10/21/2009

**Teaching Note:** 8B03M01

The cigar industry in Cuba has a mythical aura and renown that give it unparalleled recognition worldwide. The relationship between Cuba and the United States makes the situation in this industry particularly intriguing. Cuban cigars cannot currently be sold in the United States, even though it is the largest premium cigar market in the world. This note provides an opportunity for a structured analysis using Potter's five forces model and to consider several scenarios including the possible lifting of the U.S. embargo and the relaxation of Cuba's land ownership laws.

Panma Co-operative (Revised)

Paul W. Beamish, Elizabeth M.A. Grasby, Krista Wylie

Publication Date: 7/26/2000

Version Date: 1/11/2010

Teaching Note: 8B00M16

A new marketing advisor at Panmai, a women's weaving co-operative located in Kaset Wisai, Thailand, is trying to formulate a strategic plan for Panmai's future. Specifically, he needs to decide which product/markets and which methods of distribution are appropriate for Panmai, whether Panmai should pursue more foreign sales and how to solve many operational problems existing at the company. Since he will only be at Panmai for two years, any changes he makes must be sustainable without his presence.

Pepsi Challenge - Russia 1992

Paul W. Beamish, Honoro Todino

Publication Date: 7/4/1994

Version Date: 8/9/2002

Teaching Note: 8A94G01

Russia was in transition from a planned to a market economy. Pepsi had preceded Coke into the former Soviet Union and was optimistic that it could further increase its market presence. However, it required a Russian organization to implement its strategy. While Pepsi had previously run its Soviet operations from Vienna, they now needed to hire and develop Russian employees and managers. A 31 year-old human resources manager in Pepsi International, was tasked with building the Russian organization. Recently arrived in Moscow, he found an incomplete business infrastructure, language, cultural and ethical issues to contend with, fluid and uncertain regulations and few Russians with relevant business experience. His challenge was to hire a Sales manager and a Technical Engineering manager, as well as develop staffing compensation and training priorities for the new Pepsi Russian organization. The case is written to illustrate the localization challenges confronting a mid-level transition manager.

The case deals with a scam that has been run out of Nigeria since 1990. In it, foreign companies are approached for their assistance in facilitating an international transfer of funds in order to receive a very large but unearned commission. In the case, a Hong Kong-based manager who is travelling to Nigeria is unaware that he is walking into a situation where his company is about to be cheated. The objective of the case is to raise the issue of ethics in the conduct of international business. A follow-up case (9B08M39) is available.

Prince Edward Island Preserve Co.
Paul W. Beamish
Publication Date: 1/1/1991
Version Date: 5/26/2003
Teaching Note: 8A91G05

Prince Edward Island Preserve Co. is a producer and marketer of specialty food products. The company president is contemplating future expansion. Two cities were of particular interest: Toronto and Tokyo. At issue was whether consumers in both markets should be pursued, and if so, how. The choices available for achieving further growth included mail order, distributors, and company controlled stores. The case helps students watch existing resources and capabilities with potential growth opportunities.

Prince Edward Island Preserve Company: Turnaround
Paul W. Beamish, Nathaniel Lupton
Publication Date: 5/15/2008
Version Date: 9/5/2008
Teaching Note: 8B08M49

In April 2008, Bruce MacNaughton, president of Prince Edward Island Preserve Co. Ltd. (P.E.I. Preserves), was focused on turnaround. The company he had founded in 1985 had gone into receivership in May 2007. Although this had resulted in losses for various mortgage holders and unsecured creditors, MacNaughton had been able to buy back his New Glasgow shop/cafe, the adjacent garden property and inventory, and restart the business. He now needed a viable product-market strategy.

Research in Motion: Managing Explosive Growth
Rod E. White, Paul W. Beamish, Daina Mazutis
Publication Date: 5/15/2008
Version Date: 8/26/2008
Teaching Note: 8B08M46

Research in Motion (RIM) is a high technology firm that is experiencing explosive sales growth. David Yach, chief technology officer for software at RIM, has received notice of an impending meeting with the co-chief executive officer regarding his research and development (R&D) expenditures. Although RIM, makers of the very popular Blackberry, spent almost $360 million in R&D in 2007, this number was low compared to its largest competitors, both in absolute numbers and as a percentage of sales (e.g. Nokia spent $8.2 billion on R&D). This is problematic as it foreshadows the question of whether or not RIM is well positioned to continue to meet expectations, deliver award-winning products and services and maintain its lead in the smartphone market. Furthermore, in the very dynamic mobile telecommunications industry, investment analysts often look to a firm’s commitment to R&D as a signal that product sales growth will be sustainable. Just to maintain the status quo, Yach will have to hire 1,400 software engineers in 2008 and is considering a number of alternative paths to managing the expansion. The options include: (1) doing what they are doing now, only more of it, (2) building on their existing and satellite R&D locations, (3) growing through acquisition or (4) going global.

**Resina: Managing Operations in China**  
**Paul W. Beamish, Jordan Mitchell**  
**Publication Date:** 4/28/2006  
**Version Date:** 9/21/2009  
**Teaching Note:** 8B06M48

Resina is a global manufacturer of resins and surfacing solutions headquartered in Helsinki, Finland, and has three production facilities and 12 sales offices in China. The head of Asia Pacific for Resina needs to decide what should be done about Beijing and Guangdong. Should Beijing remain in operation, be shut down, or moved to another area where demand for liquid bulk resins is stronger. Similar options exist in Guangdong. In aiming towards profitable operations, he needs to consider the buoyancy of local demand, Resina’s partner in Beijing, local and foreign competitors and appropriate managers in each operation.

**Russki Adventures**  
**Paul W. Beamish, Ian Sullivan**  
**Publication Date:** 7/9/1992  
**Version Date:** 12/20/2002  
**Teaching Note:** 8A92G02

The two major partners in Russki Adventures contemplated their next move. They had spent the last year and a half exploring the possibility of starting a helicopter skiing operation in Russia. Their plan was to bring clients from Europe, North America and Japan to the Caucasus Mountains to ski the vast areas of secluded mountain terrain made accessible by the use of helicopter and the recent business opportunities offered by ‘glasnost’. Three options for proceeding were being considered. The first was to proceed with the venture on their own, in the Caucasus Mountains area that had been made available to them by a Soviet government agency. The second was to accept the offer of partnership with Extreme Dreams, a French tour operator that had recently begun operations in the Caucasus region. The final option was to wait, save their money and not proceed with the venture at this time. This is a good case to emphasize small-scale international ventures and the complexities of operating in a rapidly changing and politically unstable environment.

**Ssangyong Corporation**

*Paul W. Beamish, David J. Sharp, Chang-Bum Choi, Yongwook Jun*

Publication Date: 3/20/1998

Version Date: 10/3/2002

**Teaching Note:** 8A98M02

Ssangyong Corporation, a major Korean general trading company (GTC) needed to refocus its trading business to better adapt to the current environment. The Korean manufacturers' departure-from-traders
phenomenon had led to fierce competition among traders, and weakened GTCs' bargaining power over manufacturers. The first issue requiring resolution was whether and how Ssangyong's existing product-market portfolio might be redefined. A second issue was how to further internationalize its trading operation. A third issue was how to decide which new businesses Ssangyong should pursue.

Stella Artois in the U.K.
Pau W. Beamish, Anthony Goerzen
Publication Date: 12/6/2001
Version Date: 12/4/2009
Teaching Note: 8B01A17

Stella Artois, Interbrew company's flagship brand of beer, has experienced phenomenal success on the international market. The United Kingdom market has played a critical role in that success, and Interbrew needs to assess the reasons for this. Interbrew's managing director and its chief marketing officer are meeting to have a discussion about how to proceed in developing the Stella Artois brand. First, they need to understand what part of the company's success was due to expert marketing practices and what part might possibly be due to being in the right place at the right time. As well, they want to assess what possible steps might be taken to spread these practices across the corporation for use in the company's global marketing strategy.

9A89G005
Sterling Marketing Products Inc.
Pau W. Beamish, Jonathon L. Calof
Publication Date: 1/1/1989
Version Date: 1/21/2002
Teaching Note: 8A89G005

The international marketing manager of Sterling reviews his options for selling their newly-developed embosser in the United Kingdom. Possibilities exist for licensing, exporting, joint ventures and acquisitions. In addition, the product is attracting attention from dealers around the world. Sterling requires an international expansion strategy in terms of which markets to enter, speed of entry and choice of mode.

Strategic Intelligence Pte. Limited (A)
Pau W. Beamish, Tom Gleave
Publication Date: 6/20/2001
Version Date: 4/30/2002
Teaching Note: 8B01M32

Strategic Intelligence Pte. Limited is a research and new-media company that provides Asian-based economic and political information. The managing editor is facing several challenges in building a new online business intelligence service that focuses on Asia's new economy. As the person responsible for the company's first Internet related initiative, he is expected to design, manage and help market the new initiative that will be independent from, yet complementary to, the company's existing events-oriented and research services. Although he is satisfied with the content that has been developed, he still needs to resolve several issues regarding target audience, pricing policy, revenue diversification options and service awareness. A sense of urgency pervades the situation, since he is expected to ensure that the new service will contribute 25 per cent of total company revenues within the next year.

Strategic Intelligence Pte. Limited (B)
Pau W. Beamish, Tom Gleave
Publication Date: 9/5/2001
Version Date: 4/30/2002
Teaching Note: 8B01M39

Strategic Intelligence Pte. Limited is a Singapore-based research and media company. The newly appointed director of advisory services is considering the challenges in building the company's latest service offering. The company's strong emphasis on this new service is a departure from their previous strategy of attempting to develop its existing events, custom research and online information services in a relatively even manner. He needs to formulate a plan that will ensure the new service contributes about half of the company's revenue within the next year. This case may be used with Strategic Intelligence Pte. Limited (A), 9B01M032.

Sun Life Financial is a large insurance conglomerate with $14.7 billion in annual revenues. The vice-president for China must formulate an approach for his company’s entrance into China. Sun Life has achieved two important milestones: the right to apply for license and the signing of a Memorandum of Understanding for Joint Venture with China Everbright, a local securities company. The financial vice-president must consider strategic options for entry and choose a city in which to focus his efforts in getting a license. In doing so, he needs to consider Sun Life’s overall priorities, strategic direction and how he will sell the concept to senior management in Canada. Intended for use in an introduction to international business course, the case includes assessing internal capabilities against an environmental scan, formulating strategy and making operational decisions relating to city selection. It also introduces the idea of joint venture management and government relations.

TVOntario is a non-profit television station owned by the Ontario government that provides educational programming commercial-free. TVOntario is recognized as a world leader in quality educational programming for all ages as well as providing programming on important issues within the province. However, the television broadcasting industry is very competitive, and larger networks have greater cash flows to produce programs that encourage advertising and increase revenues. TVOntario’s Sales and Licensing Department revenues continue to decline, and the managing director of revenue and development is faced with determining the future of the department. The station’s board of directors has put pressure on him to make a decision and he needs to come up with a plan before they decide to shut the department down.

Technophar in Viet Nam
Paul W. Beamish, Andrew Delios
Publication Date: 9/1/1995
Version Date: 2/26/2003

Teaching Note: 8A95G12

Technophar, a small but profitable manufacturer of hard gelatin capsule machines, was confronted with a potential default in its technology transfer agreement with a Vietnamese pharmaceutical firm. At issue is whether the company should pursue or terminate the Vietnam contract, particularly in light of potentially greater opportunities in neighbouring China. More fundamentally, Technophar needs to develop an international expansion strategy in terms of which markets to enter and how to determine market opportunities. This case should be used in an international business course to illustrate issues central to internationalization and the problems of a Stage I company progressing to Stage II, while competing in world markets.

Trojan Technologies Inc: The China Opportunity
Pratima Bansal, Paul W. Beamish, Ruihua Jiang
Publication Date: 10/28/1999
Version Date: 7/21/2008
Teaching Note: 8A99M28

The senior market associate of Trojan Technologies reflected on the water shortages anticipated in developing countries created by their explosive economic growth. Trojan sold water disinfecting equipment, and the senior market associate's job was to find new areas for growth. China was particularly intriguing because it had as much water as Canada, but 40 times the population, and its economic boom would further stress current water resources. Trojan had set growth hurdles of 30 per cent per year, and it needed new markets to reach that objective. The task in new market development was to determine if Trojan should enter China, and if so, when, where and how. The associate knew little of China: how decisions were made for water disinfecting equipment, whether Trojan's patents would be protected, and what level of resources would be required. The vice-president of new business development wanted to see recommendations within the month. AWARD WINNING CASE - This case was second place winner of the MDC of Hong Kong Case Writer of the Year Award in 2000.

Where Have You Been?: An Exercise to Assess Your Exposure to the Rest of the World’s People
Paul W. Beamish
Publication Date: 11/08/2011
Teaching Note: 9B11M107

This exercise assesses one's exposure to the rest of the world's peoples. A series of worksheets require the respondents to check off the number and names of countries they have visited and the corresponding percentage of world population which each country represents. By summing a group's collective exposure to the world's people, the result will inevitably be the recognition that together they have seen much, even if individually some have seen little. The teaching note provides assignments and discussion questions which look at: why there is such a high variability in individual profiles; the implications of each profile for one's business career; and, what it would take for the respondent to change his/her profile.

For marketers, it underscores the need to gather greater base knowledge about opportunities abroad.
