May
Ivey partners with Indian Institute of Management Bangalore (IIMB)
Dean Stephenson signed a MOU on May 24 with the IIMB to create new opportunities for joint research projects, exchanges, and international conferences in India and Canada.

June
Arkadi Kuhlmann receives honorary degree
Arkadi Kuhlmann, HBA ’71, MBA ’72, Chairman and CEO of ING DIRECT, Ivey Advisory Board Chair, and co-Chair Ivey Campaign for Leadership, received an honorary degree from Western on June 18.

August
Ivey welcomes new MSc. class
Ivey welcomed 36 new students on August 3, who make up the inaugural class of the Master of Science in Management program.

Pierre Morrissette receives honorary degree
Pierre Morrissette, MBA ’72, CEO and founder of Pelmorex Media Inc., received an honorary degree from Western at MBA Convocation. Ivey’s Institute of Entrepreneurship is named in his honour and at the ceremony, Dean Stephenson announced an additional $2.5 million had been donated to the institute by Mr. Morrissette.

September
Ivey launches Campaign for Leadership
Ivey kicked off its fundraising campaign, Campaign for Leadership: Stepping Up for the Next Generation, with news that it had received a $1.3 million boost from Great-West Life, London Life & Canada Life and Power Financial Corporation.

Ivey launches Leadership on Trial report
A nine-month research project exploring leadership before, during and following the economic crisis culminated with the launch of Ivey’s groundbreaking report, Leadership on Trial: A Manifesto for Leadership Development.

Ivey launches Ian O. Ihnatowycz Institute for Leadership
On September 21 at the Leadership on Trial report launch, Ivey announced the formation of the Ian O. Ihnatowycz Institute for Leadership following a generous gift from Ian Ihnatowycz MBA ’92, and Marta Witer. The $3.5 million gift from Mr. Ihnatowycz and Ms Witer was matched by a further $1.5 million from Western.
At Ivey we don’t just study leadership: we practise it, day in and day out. Our students learn to lead by creating bright ideas, making tough decisions, inspiring others, and serving their communities. In other words, they learn to lead by leading.
At Ivey, we believe the best way to teach international business is being international. That’s why, in 1998, we were the first North American business school to establish a campus in China, the Cheng Yu Tung Management Institute, to offer Executive MBA and custom executive development programs. With about a dozen different nationalities in each EMBA class, students gain an understanding of different cultures and get a chance to witness the Asian economic surge firsthand while receiving the same world-class Ivey degree.

Changsheng Duan is a student in Ivey’s Executive MBA program in Hong Kong.

“I chose Ivey’s Hong Kong EMBA even though I work and live in Beijing, because it’s globally-focused and gives me the opportunity to learn with people from different countries and industries.”

Changsheng Duan, EMBA ’11
Ivey Connects

A student-led organization, Ivey Connects inspires students to contribute to the societies in which they operate and provides opportunities to think about sustainable development and CSR from a business perspective.

Tanya Moryoussef, HBA ’12

“The hands-on learning through Ivey Connects helped to shape the type of leader I have become, and it opens your eyes to new career paths and to the value of giving back to the community.”

Tanya Moryoussef, HBA ’12

Ivey Connects

A student-led organization, Ivey Connects inspires students to contribute to the societies in which they operate and provides opportunities to think about sustainable development and CSR from a business perspective.

Tanya Moryoussef was the section leader for a student group paired with the London-based non-profit organization, Future Possibilities for Kids.
Ivey LEADER Project

Envisioning a world in which all regions have the tools, skills and abilities to participate in a free-market economy, Ivey student-led LEADER (Leading Education and Development in Emerging Regions) Project, launched in 1991, brings the Ivey case method to students, entrepreneurs and managers in emerging regions.

Melanie Thomas travelled to Chişinău, Moldova, one of the poorest countries in Europe, for two weeks in May as part of the Ivey LEADER Project.

“You experience diversity in the classroom, but, when you travel abroad, it’s taken to a whole new level. Everything you know is gone—your surroundings, your contacts, the language—and you must adapt. It prepares you for any situation in the workplace.”

Melanie Thomas, HBA ’11
Team Work Working in teams, common to all of Ivey's programs, reflects the real world of business. Working with an international group, such as the student teams in Ivey's MSc program, reflects the increasing cultural diversity of business and the need to communicate and combine individual strengths to maximize impact.

Bushra Tobah is a student in Ivey's inaugural Masters of Science in Management program. (left to right: Adam Kauppi, Sherisse McLaughlin, Bushra Tobah, and Mudasir Marfatia)

“In an international classroom our common ground is that we are all learning the same material. The classroom culture transcends our national cultures.”

Bushra Tobah, MSc ’11
Ivey New Venture Project  Ivey’s MBA and HBA students get a first-hand look at start-up success through the Ivey New Venture Project. This team-based field project takes students through the process of launching a new venture.

Paul von Martels is working on a business project called “Gourmet Weeds,” which involves licensing European hydroponic technology to produce leafy green vegetables and herbs.

“A good business idea can’t stand on its own—entrepreneurs need commitment, competent team members and a passion to win. The Ivey New Venture Project tests all these angles.”

Paul von Martels, MBA ’11
International Study Trip helps Ivey students to gain appreciation of different cultures and business environments by providing on-the-ground exposure to some of the world’s fastest growing economic regions. In 2010, 84 Ivey students visited China and 32 students travelled to India.

Jean-Paul Cadeau participated in Ivey’s inaugural trip to India in December 2010. (left to right: Victor Diab, Adam Schlegel, Fiorella Marchinares, Gunpreet Rekhi, Rachael Ibey, and Razy Farook)

“...My thinking was bounded by my North American perspective. You have no idea until you get there and immerse yourself in that culture; it’s not academic in any way, shape or form. It’s real learning.”

Jean-Paul Cadeau, MBA ‘11
We are Canada’s leadership school. We develop leaders. This shared vision keeps us focused on doing the right things for our students.
In February 2010, I had the honour and privilege of participating in the Vancouver Olympics as a member of the VANOC board of directors. Being a part of this spectacular event was for me, as for all Canadians, an inspiration and source of great pride. But, for those of us who had been part of the planning and execution behind the scenes, it was also the culmination of years of hard work, and a fair share of unexpected challenges along the way. We persevered; we had a vision for Canada; and, we were rewarded with the support and pride of a nation.

I have seen the same spirit and equally inspiring outcomes as Dean of the Richard Ivey School of Business. Over the past five years, I have often used the words “gaining momentum” to describe our progress. It is a momentum that has continued to grow throughout the challenges of a persistent global recession, and despite an increasingly complex and competitive international marketplace for business education.

I am not surprised by our success. A culture of excellence and a spirit of tenacity pervade all we do. That has not changed in the 88 years of the School’s history. Most importantly, we know who we are. We are Canada’s leadership school. We develop leaders. This shared vision keeps us focused on doing the right things for our students. We are rewarded by their success and the positive impact they have in the world as Ivey leaders.

2010 was an outstanding year for Ivey from new partnerships in India; the hiring of 17 new faculty members; the first year of our MSc program; the public launch of our Campaign for Leadership, which has already achieved 75 per cent of its $200 million goal; continued excellence and quality growth in all our degree programs; and, the announcement of the new Ian O. Ihnatowycz Institute for Leadership at Ivey that will allow us to pursue even more research, outreach, and student activities focused on leadership development.

This annual report is a testament to the spirit and pride, the dedication and hard work, and the unremitting commitment to excellence of the faculty, staff, students and alumni, who are the Ivey Community. Thank you for your contributions to our success in 2010, and for your belief in our future. You keep us inspired and aspiring to be our best.

I close with the words of my friend John Furlong, President of the 2010 Vancouver Olympics: “You are living proof that men and women everywhere are capable of doing great good, and that in life as it is in sport, we should always give our best and never, ever give up.”

The best is yet to come.

CAROL STEPHENSON, O.C.
DEAN, RICHARD IVEY SCHOOL OF BUSINESS
LAWRENCE G. TAPP CHAIR IN LEADERSHIP
"LEARNING AND INNOVATION GO HAND IN HAND. THE ARROGANCE OF SUCCESS IS TO THINK THAT WHAT YOU DID YESTERDAY WILL BE SUFFICIENT FOR TOMORROW."
—WILLIAM POLLARD

With a renowned undergraduate program that is growing with more and higher quality candidates, a new MSc in Management, a resurgent MBA that competes with the world’s best, an EMBA program that is attracting more executives than our three closest competitors combined, and an increased diversity and a sharper focus in the classroom, Ivey is leading a new era in management education.

**MBA**

At the MBA level, the School has completed the transition to a single-intake model with a comprehensive new approach to recruiting. From where we seek to find potential students to how we engage and assess those with the best fit for Ivey, the MBA program competes with the best in the world.

"On paper this is the best incoming group of MBAs we’ve ever had," says Eric Morse, Associate Dean of Programs. "As we go through the second round of recruiting with our new tactics I can tell you that it’s more competitive than ever to become an Ivey MBA student. The quality of our students reflects that, and, more importantly, industry is acknowledging that through outstanding placement rates [see page 21]."

**EMBA**

Ivey’s EMBA program continues to be the market leader in Canada—with more than 50 per cent market share in the GTA—and waiting lists at every intake. A new section of the customized J.D. Irving EMBA Program will run from February 2011 to June 2012, and the School also launched a new Agricultural Bank of China (ABC) EMBA Program in partnership with BMO Financial Group in 2010. This program will see 26 top executives (of more than 470,000 employees) at ABC relocating to Canada for a year to study at Ivey and BMO Financial Group.
HBA
“One of the myths I hear is that our growth must be diluting the talent. That’s just wrong,” says Morse. “Program growth was carefully researched, planned and, quite frankly, executed with tenacity by the HBA team over the past five years. Traditionally, Ivey was considered a great undergraduate business program for students in southern Ontario. That was our market. Today, we’ve become a great program for Canada and the world. That’s our market. We feel really good about where we are now, and where we are headed.”

What is driving HBA growth? First, there are general demographic trends. More students are entering university today than ever before, and a greater percentage of those students choose to pursue a business degree. These two trends alone have created a much larger pool of candidates. In addition, we’ve made great strides in attracting more women to the HBA program (50 per cent of pre-admitted students (AEO) this year are women).

At eight sections, from a geographic perspective, the HBA class will be composed of the equivalent of two sections of Canadians from outside of Ontario and one section of international students. Today Ivey better reflects the Canadian mosaic. This growth in diversity allows us to maintain an unwavering commitment to student quality. It’s working. With student placement greater than 90 per cent—even through an economic downturn—we remain a market leader in placement and salary among undergraduate business programs in Canada.

The HBA program has grown from a regional to an international program, competing with the top programs in the U.S., and is, what Morse calls, “Canada’s undergraduate business program—open to the world.”

MSc
In August 2010, Ivey welcomed 36 students, fresh from their undergraduate degrees, as the inaugural class of the MSc in Management Program. These students bring a dynamic array of international experience to the classroom, including the collective ability to speak more than 20 different languages. The degree is focused on international business and is delivered in conjunction with the CEMS Master in International Management Program—ranked as the top Masters in Management (MIM) program in the world according to the Financial Times. It addresses the need for a new breed of analyst and manager, who not only understands best practices, but can also assess how innovation and changing best practices affect international management.

Across our Programs
The diversity of our student body strengthens our programs by adding a greater breadth of perspective that is essential to developing outstanding leaders in a global business environment.

“It makes for a more dynamic classroom discussion when you have people from different cultural backgrounds—people with different ideas about business,” says Morse. “Employers are looking for people who are more globally-versed. Business is global. The companies that our students are going to be working for are global. It is a part of our mission and I feel great about the momentum we are experiencing working on this strategic goal—Ivey develops business leaders who think globally, act strategically, and contribute to the societies within which they operate.”
Career Management team connects students to real world

“We’re a bridge that helps students understand and connect to the recruiting world,” says Sharon Irwin-Foulon, Director of Career Management. “But, of equal importance, is helping students build skills that they’ll use, not only for their first jobs, but for the life of their careers.”

That real-world connection extends far beyond job leads. Through classroom work and one-on-one coaching that helps students develop personal brand strategies, as well as interview and networking skills, Ivey’s students are armed with a toolkit for future success. Considered a critical element of success at Ivey, Career Management is integrated into the core of both the MBA and HBA curriculum. Four MBA classes are led by Irwin-Foulon, while Craig Ingram, Associate Director of Career Management, runs the five HBA classes. These classes, based on the familiar case method, begin early in the school year so students can prepare for the upcoming recruiting periods.

“The goal is to get people thinking critically about what they want to do and to be mindful of how the marketplace works, so they can make decisions that will help them focus and prepare,” says Irwin-Foulon. “Feedback from our annual recruiter survey shows most recruiters find Ivey students are better prepared for the recruiting process and handle themselves very professionally.”

“Our approach is to develop strong self-marketing skills. Students learn to think about what they want to do and think about themselves as a unique collection of skills, experiences and competencies,” explains Irwin-Foulon. “They define their brand, target audience, and the best way to take that to market.”

For the MBAs, additional support comes from Get Connected, a three-day Career Management program in Toronto involving corporate information sessions, mock interviews, and educational panels with industry experts that cover the functional and industry choices typically facing MBAs. A highlight of Get Connected is a networking night with about 150 recent MBA alumni where students experience firsthand the power of Ivey’s global alumni network.
Building relationships with corporations and bringing new corporate recruiters on board is also critical to Career Management’s success. Associate Director Karen Conway, points to the results of a recent survey of more than 80 top firms, which were extremely positive. In fact, Ivey Career Management is considered the best in Canada and consistently scores the top marks in both recruiter and student satisfaction surveys conducted by international publishers, such as BusinessWeek and Financial Times.

Of course, placement rates are still an important measure of success and Ivey’s rates for both MBAs and HBAs are consistently strong (see pages 21 and 24). Ivey’s unique approach, which incorporates traditional on-campus recruiting, corporate outreach focused on a strong client experience, and helping students build the skills to uncover and land roles in the hidden job market, all contribute to the success of Ivey students, even in the most competitive markets.

"Students might uncover an opportunity that is not formally advertised or pursue a career in a different area, such as the non-profit industry, that doesn’t have formalized recruiting strategies," says Irwin-Foulon. "We try to give students the skills and support so, if they want to do something different, they can figure out how they are going to do that and set themselves up for success."

"The ultimate measure of our success is the success of alumni," says Irwin-Foulon.

And with more Ivey graduates in the Top 40 Under 40™ than any other business school, and three in five graduates in senior executive positions in firms around the world, Ivey graduates are achieving great success.
A new approach to MBA admissions

When it comes to ensuring the right mix of MBA students—those who will succeed in the program, enhance the learning experience in their class, and find success in their careers—Ivey has discovered the recipe for success.

“With our close ties with recruiting organizations’ best practices we have been in a great position to work hand in hand with the MBA Admissions teams over the past several years to continually grow tighter, smarter and more consistent in our recruiting,” says Sharon Irwin-Foulon, Director of Career Management.

Career Management—in conjunction with Fraser Johnson, HBA ’82, MBA ’92, PhD ’95, Director, MBA Program, and Eric Morse, Associate Dean of Programs—refined admissions processes to create consistent metrics for assessing candidates. Ivey’s HBA program also uses consistent candidate selection criteria and processes that ensure a strong talent pool.

“Our processes and screening are geared toward assessing a candidate’s potential success in our program. You could certainly use the same assessment at another school but it would not provide the same clarity on the calibre of the candidates. Ours is very focused on the unique demands of the Ivey MBA program and what our alumni have come to expect from one another,” says Johnson. “There was a well-thought-out and time-intensive process to develop how we assess candidates at various stages in the recruiting process. We have looked at how people did in the class and have traced that back to the components of our screening to ensure we understood leading indicators for predicting success at Ivey.”

“This is not about how much we like the candidates, but how well they’ll do in the program. We’re doing a disservice if we let people into the program and they don’t do well,” says Johnson.

We wouldn’t have pursued this strategy of entering India if we hadn’t done our homework,” says Ariff Kachra, PhD ’01, Ivey’s Director of India Development. “We have spoken to a number of executives and they tell us the top Indian business schools do a tremendous job with MBA programs, but top-level executive development is still something new for Indian business schools and it’s something that we’re very experienced in at Ivey.”

The need for executive development in India, as well as the potential to learn from the fast-growing country, piqued Ivey’s interest in bringing its Executive Development programs to India. With a GDP growth of almost 9 per cent, India is one of the fastest-growing economies in the world and learning opportunities are tremendous, maintains Kachra.

“Indian managers don’t worry about hiring one or two people, they worry about hiring thousands of people every year. How often do you get to learn from a business environment that’s growing at that speed?” he asks. “This is a wonderful opportunity for our researchers, teachers, programs and executive development.”

“Indian CEOs are not concerned about being successful today, they are concerned about being successful when that GDP drops—when things are leaner, there are more competitors and consumers are pickier about the products they’ll buy,” says Kachra. “Executive education for Indian companies becomes extremely important to secure sustainable, long-term competitive advantage in their own market space.”

Ivey has a four-pronged strategy for entering India, which involves executive development, case publishing, partnering with top Indian schools, and increasing recruiting efforts in India. Already, about 10 per cent of Ivey’s MBA students come from India and the alumni base is growing rapidly.

As the largest publisher of Asian-based cases, Ivey plans to increase its leadership in this field by publishing hundreds of Indian-based cases in the next five years. Some Indian-based cases are already in the publication process thanks to an intake from a national case competition at the Indian School of Business (ISB) that Ivey sponsored in August 2010 and will again in 2011.

In the past two years, Ivey has gradually increased its presence in India. Starting with a trip to India by Ivey’s Executive Team in October 2009 to explore partnerships and engage with the academic and business community, the visit culminated in Ivey leaders signing a partnership with ISB for a Case Development Centre. In May 2010, Ivey also signed a memorandum of understanding with the Indian Institute of Management Bangalore to create new opportunities for joint research projects, exchanges, and international conferences in India and Canada.

“If Ivey is in India, it becomes a stronger school in Canada. If Ivey is in India, Hong Kong becomes a better executive education choice. And, because we’re in Hong Kong and Canada, Ivey is a better choice for Indian executives,” says Kachra. “This is not about three institutions—it’s about one institution getting stronger in every market in which it operates. It’s a truly transnational strategy.”

INTERNATIONAL
Ivey spreads its wings in India
WITH AROUND 10 PER CENT OF IVEY’S MBA STUDENTS ALREADY DRAWN FROM INDIA, AND GROWING INTEREST IN THE IVEY CASE METHOD OF LEARNING, A LOGICAL STEP WAS TO TAKE IVEY PROGRAMS TO INDIA. 

ARIFF KACHRA, PhD ’01, Director of India Development

MBA inaugural trip to India in December 2010
Q: What are the major business shifts that you have seen in Hong Kong?

Slaughter: For one thing, we have seen a major shift in the education industry. It has been increasingly competitive in the education field with more major players in Hong Kong as Asia continues to prosper and grow.

De Silva: The biggest shift since I have been here has been in world economic power from West to East. A huge transition has been made from “Made in China” to “Sold in China” and that has created the world’s fastest-growing, middle class consumer market. This is having a bigger impact on global markets than China as a producer of goods. China has also shifted from purely internal development to an international focus. With China’s economic might shifting from internal to international, I see us moving into a new era where people in the West will soon be saying, “My parent company is from China,” instead of, “My parent company is active in China.” That has huge implications.

Q: What are the implications of these changes for business and for business educators?

De Silva: Tremendous mind shifts are required as businesses adapt. As Chinese companies lift, expand and acquire international properties, they require cultural know-how and exposure to operating in western environments. Our Agricultural Bank of China EMBA program, in partnership with BMO in Canada, is an example of a major Chinese player being educated by us to get that know-how and experience. On the flip side, as multinationals’ economic value shifts to China and India, these markets can no longer be treated as outposts for rotating top executives. Serious talent development is required to create strong, sustainable local leadership with international know-how and vice versa. As business educators, we are in the centre of this.

Q: Do these changes impact the content and focus of the EMBA?

Slaughter: As the number one producer of Asian cases in the world, Ivey has a wealth of material and expertise on Asian firms. Our goal now is to expand the production of cases and incorporate more of that material into all courses in both Asian and Canadian programs.

Q: What did Ivey do differently in 2010 in Hong Kong compared to five years ago?

Slaughter: We are recruiting students from a broader area and doing more to recognize alumni. In the eight years I’ve been here, the biggest change I’ve seen is in the strength and size of the alumni base, and I would like to see greater engagement of the HBAs and MBAs.

De Silva: What we have with Asia is 12 years of experience—our first international experience base for Ivey—right in the living room of China. As we look at continued growth in Asia, we need to work with our India team as Ivey pursues its second international market. What made us successful when we entered China 12 years ago can no longer be replicated. A new Asia strategy that will enable the School holistically to optimize its impact on these major markets is critical.

Q: Leadership on Trial, now translated into Chinese, raised a lot of issues around the development of corporate cultures. Are you seeing changes in the corporate cultures and leadership development practices in Asia?

De Silva: I see China as being disciplined in studying and learning from mistakes. There’s a famous Chinese saying, “to know the road ahead, ask those coming back.” So I think very much this financial crisis is something the Chinese will learn from, but will apply in their own way. Often organizations think their Western practices will work in China. In fact, they won’t because the culture, environment and the way information gets shared—the way decisions get made in Chinese organizations—isn’t the same.

If you would like to read the full interview on Ivey in Asia, please go to ivery.ca/annualreport/ChinaInterview
For Ivey, the strategy is global impact through a cross-enterprise approach to research that aligns faculty from diverse disciplines to solve some of the big issues facing businesses around the globe today.

In 2005, the School selected four initial areas where it believed it could have the most impact: leadership, sustainability, entrepreneurship and emerging markets. During the past four years, faculty across the School have rallied to support research in these areas and two centres—leadership and entrepreneurship—have grown into donor-funded research institutes.

“We are moving away from a model where our faculty just do their own thing to asking the faculty to coalesce with other members in their group, with new hires and around institutes. This allows our research and teaching to have greater impact,” says Rod White, HBA ’74, Associate Dean, Faculty Development and Research. “We are being much more strategic on the research side. We are making institutional choices, and the School commits resources to strategic areas. We certainly support faculty in the pursuit of their personal research interests and goals but they are also encouraged to look for ways their research fits with areas of strategic importance to the School.”

In 2010, Ivey celebrated two significant milestones in its development of institutes. On September 21—on the heels of the launch of Ivey’s groundbreaking report on the future of leadership, Leadership on Trial—Ian O. Ihnatowycz, MBA ’82, and his wife, Marta Witer, announced their $3.5 million gift to support the formation of the Ian O. Ihnatowycz Institute for Leadership at Ivey. Combined with $1.5 million in funding from The University of Western Ontario, Ivey received $5 million in total for a Chair in Leadership and operational costs. Under the guidance of Ivey Associate Professor Gerard Seijts, the Institute’s Executive Director, the Ian O. Ihnatowycz Institute for Leadership aims to bring together research, teaching and outreach to demonstrate Ivey’s excellence in and commitment to leadership. This institute joins the Pierre L. Morrissette Institute for Entrepreneurship, which was established in 2006.

“Institutes allow for our research and teaching to be more collaborative and to have far greater reach and impact,” says White. “We stress our relevance—that we want to stay connected with practice.”
Whether planning international policies for a secure global economy, addressing food and water challenges, promoting sustainable energy sector policies, or improving Canada’s healthcare system, Ivey’s specialty research groups and centres are making a difference in public policy.

2010 marked the launch of numerous key initiatives from groups—including the Lawrence National Centre for Policy and Management, Agri-Food@Ivey, Energy@Ivey and the Ivey Centre for Health Innovation and Leadership (ICHIL)—that will help to pave the way for major public policy changes.

Since its launch in 2009, ICHIL has provided direction for making Canada’s healthcare system a source of sustainable advantage. The Centre launched a white paper earlier this fall that provided key recommendations for improving the efficiency and effectiveness of health care and took steps to build on these recommendations at its second global health conference in late November.

Dr. Kellie Leitch, ICHIL’s Chair, argues Canada is not translating its world-class science and research into better results on the healthcare front lines. “We need to engage in more vigorous debate about how we imbed innovative thinking and continuous improvement into the culture of our healthcare system,” says Leitch.

David Sparling, Chair of Agri-Food Innovation and Regulation, has also been calling for leaders to consider different approaches to problems. He submitted a paper to delegates at the G20 Summit in Toronto that promotes genetically-modified crops to feed the world, arguing improved food distribution alone will not be able to meet the world’s future food demands.

The Lawrence National Centre, led by Dianne Cunningham, has been active on the policy front. It helped spearhead a G20 Leaders’ Symposium prior to the Summit to discuss how world leaders can stabilize the global economy.

"With government, business and academia at the same table, we would witness more effective and visionary public policy decisions. Canada would be the winner,” says Cunningham.

The newly formed Energy@Ivey group, led by Professor Guy Holburn, has also been hard at work. It hosted a day-long conference last June attended by industry leaders from North America and Europe on how good governance and regulation practices can improve performance and investment in the electricity industry in Canada.

"Governance reforms that promote stability in the regulatory environment can stimulate significant levels of private investment,” says Holburn.

Ivey faculty, in conjunction with industry experts on energy-sector reform, have written policy papers that have been presented to the government.

RESEARCH

Breaking new ground in public policy

Ity researchers lauded

The accolades kept coming for Ivey researchers in 2010 with several faculty members honoured for their contributions to society.

Paul Beamish HBA ’76, PhD ’85, was selected as a fellow of the Royal Society of Canada (RSC), Canada’s oldest and most prestigious organization of scientists and scholars. As well, Paul and three other Ivey PhD graduates—Julian Birkinshaw, PhD ’91, Andrew Delios, PhD ’98, and Shige Makino, PhD ’95—were recognized in a list of 20 most productive scholars contributing to international business through papers in 29 journals between 1996 and 2008.

Oana Branzei was among a select group of emerging researchers to receive an Early Researcher Award for a promising research project. Professor Branzei was awarded government funding to research socially responsible markets and movements.

Alison Konrad was one of 17 Canadian women named to The International Alliance for Women (TIAW) “World of Difference 100” list as a result of her research on women on boards, which was cited as a critical pillar in the argument for putting more women on boards.

Greg Zaric, a Canada Research Chair in Health Care Management Science since 2006, received a five-year renewal via a Tier 2 Canada Research Chair award to continue his research to help the overburdened health-care system make better spending decisions.
New Ivey faculty bring diverse expertise and experience

In 2010, Ivey added 17 new faculty members from top international schools. This impressive group of professionals—the largest addition yet—reflects Ivey’s high standards of excellence in both teaching and research and brings a broad range of cultural and regional backgrounds and research interests.

Rod White, HBA ’74, Associate Dean, Faculty Development and Research, says the only parallel to this burgeoning portfolio was a faculty expansion in the late 1960s as a result of a 1959 Ford Foundation report. This report sparked curriculum reforms and greater research efforts at many business schools, including the founding of Ivey’s doctoral program.

“Rod White, HBA ’74, Associate Dean, Faculty Development and Research, says the only parallel to this burgeoning portfolio was a faculty expansion in the late 1960s as a result of a 1959 Ford Foundation report. This report sparked curriculum reforms and greater research efforts at many business schools, including the founding of Ivey’s doctoral program.

“In the late ’60s and early ’70s, we had a major influx of research-trained faculty and doctoral students. Prior to that, there weren’t a lot of research-trained faculty members at business schools,” says White.

“The 2010 faculty expansion is different. It’s about growth at Ivey—growth that enables us to achieve our vision and have impact on a global scale.”

While acknowledging this faculty boost was helped by a good market for hiring, White stresses that applicants were carefully scrutinized to ensure they were genuinely interested in Ivey, and that requires a passion for excellence in the classroom as well as in research.

“You still need to get the right people to come for the right reasons,” he says. “We set out to hire the best candidates. Unlike many schools, we do not hire faculty solely to research for publication. That just results in two solitudes. We believe research must connect to the classroom and that means we select faculty who are conducting research that is relevant to the practising manager from Toronto to Mumbai.”

Once they are in the door, there is an additional onboarding process to ensure new faculty adjust successfully to Ivey. Each new faculty member is assigned a mentor to assist in developing a balanced approach to teaching, research and case writing as well as a teaching coach to address course-specific issues.

“Our experienced faculty members have really stepped up on the mentoring/coaching role. Our annual faculty retreat last May focused entirely on setting in place the infrastructure required to support this new group of faculty in the first year,” says White. “Everyone is involved. The Ivey Community has really come together to welcome its new members.”

Besides the mentors and coaches, a new faculty welcome and orientation session was held just prior to the start of the academic year, which kicked off with a barbecue at the home of Dean Carol Stephenson. Discussion topics included Ivey’s strategy, program overviews and case method of teaching. There are also twice-monthly lunch-and-learn sessions on topics such as evaluating students, Ivey’s research centres and institutes and case writing and publications to provide new faculty with additional support and information in bite-sized, easy-to-digest chunks.

With such a large group to accommodate, the 2010 onboarding efforts have really gained momentum.

“The nice thing about bringing in a large group is that it has really focused our attention and efforts. When you have 17 new people, it makes a big difference in terms of really getting people to engage. And the level of engagement has been fabulous,” says White. “It’s a win for the faculty, a win for students and a win for the School.”
Some of Ivey’s new faculty members are already making an impact by way of media reviews. Alessandro Previtero has been quoted in the New York Times and Money magazine about both saving for, and life after, retirement. Maclean’s magazine also quoted him on the spending and saving habits of Generation Y. Charlice Hurst gained media attention for her research on how positive social interactions between co-workers can lead to company benefits. Her work was mentioned in the Globe and Mail, Vancouver Province and the Ottawa Citizen. She was also profiled in a Q&A spread in Business London magazine. Rob Mitchell’s research on how unpredictable environments lead to fewer erratic decisions was featured in the Financial Times and he has also been quoted in the National Post on pursuing your passion in business.

“You still need to get the right people to come for the right reasons. We set out to hire the best candidates.”
It is commonly said that there is power in teamwork and strength in numbers. Those sentiments certainly summed up last year when we launched the $200 million Ivey Campaign for Leadership.

The Campaign is critical to the School’s strategic growth and vision. It is funding additional world-class faculty, student leadership, increased research activities, PhD scholarships, and an iconic new building to reunite Ivey’s programs together under one roof, and strengthening the Ivey Community. It is one of the most ambitious campaigns ever launched for a Canadian business school and we are proud to be the public faces of the effort.

We are also thrilled to report that, thanks to the remarkable generosity of Ivey’s alumni and friends and the unwavering support of our volunteers, the School has secured more than $157 million to date. What an extraordinary endorsement of Ivey’s vision. Thank you!

There’s a sense of pride in being part of a community that is growing in size and stature, and also in quality and distinction. And quite simply it is that sense of Ivey community and pride that is the driving force behind our Campaign accomplishments.

When Carol asked us to step up and co-Chair the Ivey Campaign for Leadership, it was the exciting vision for the School and the opportunity to have a hand in developing future business leaders that solidified our commitment and keeps us energized and engaged.

We know that we are not alone in our commitment. Since the Campaign began, more than 6,000 alumni have stepped up to support the School. Whether you are a loyal Annual Fund supporter or one of the more than 100 donors who’ve made a gift of $100,000 or more, your investment in the future of the Ivey Business School and in Canada’s next generations of business leaders is both appreciated and vital.

It is our pleasure to highlight a few of this year’s outstanding donors and it is with our sincere thanks that we recognize every donor, each one of whom has made 2010 an extraordinary year.

Sincerely,

ARKADI KUHLMANN, HBA ’71, MBA ’72
CHAIRMAN & CEO, ING DIRECT

PIERRE MORRISSETTE, MBA ’72
PRESIDENT, CEO & FOUNDER, PELMOREX MEDIA INC.

JOSEPH SHLESINGER, MBA ’86
MANAGING DIRECTOR, CALLISTO CAPITAL LP

"Just as a company needs strong leadership to succeed, Ivey needs strong leaders in our classrooms and research centres to sustain growth with quality."
Arkadi Kuhlmann, HBA ’71, MBA ’72
Campaign co-Chair

"The volunteers and donors who have already stepped up to the challenge have helped us achieve unprecedented success."
Pierre Morissette, MBA ’72
Campaign co-Chair

"This is about setting our sights high. Alumni understand and get excited about that. They see the School’s vision as something that has lasting value for the whole country, so they’re stepping up."
Joe Shlesinger, MBA ’86
Campaign co-Chair

CAMPAIGN CO-CHAIRS’ MESSAGE
Stepping up for the next generation
BMO Financial Group donated $2 million in support of the new building. In recognition of their generosity the centrally-located, 640-seat auditorium will be named in BMO Financial Group’s honour.

John Currie, HBA ’60 donated $300,000 to support the Pierre L. Morrissette Institute for Entrepreneurship’s Entrepreneur-in-Residence program.

Deloitte & Touche LLP made a donation of $250,000 to support the Ivey Centre for Health Innovation and Leadership, specifically the Ivey Consulting Project (ICP), with half of Deloitte’s donation supporting ICP administration, project development and faculty time, and the remainder in pro bono services to support Ivey’s health sector students throughout the year.

John Francis, HBA ’86 and Western alumna Susan E. Caskey, BA (Huron) ’87 made a gift of $1.125 million with $1 million dedicated to Ivey’s new building and $125,000 to endow an HBA scholarship.

Pierre L. Morrissette, MBA ’72 made an additional donation of $2.5 million with $500,000 supporting Ivey’s new building and $2 million providing ongoing support for the School’s Institute for Entrepreneurship named in his honour.

Power Financial Corporation Great-West Life, London Life & Canada Life donated $1.3 million of which $300,000 supports the new building, and $1 million is directed to Ivey’s highest priority needs.

Larry Rosen, MBA/LLB ’82 spearheaded a $1 million donation in support of Ivey’s new building from Harry Rosen Inc. to honour his father, Harry Rosen.

Kathleen & Bill Troost, MBA ’75 donated $1 million in honour of his 35th reunion. Their generous gift will be used to support leadership education at Ivey.

W C Wood Foundation led by John F. Wood, HBA ’64 made a donation of $250,000 in support of Ivey’s new building.

CAMPAIGN FOR LEADERSHIP

Highlighting a year in gifts

Throughout 2010 more than 40 donors made gifts of $100,000 or more. It is with our sincere thanks that we highlight a few of these gifts and recognize all of our generous donors in the accompanying donor listings.
Stepping up for Leadership

When it comes to defining leadership, Ian Ihnatowycz, MBA ‘82, maintains that leaders must lead by example. Known for bettering the world by encouraging sustainable investing as President, CEO and Founder of Acuity Investment Management Inc., he has again put his beliefs into action.

In September, Ian and his wife, Marta Witer, donated $3.5 million to create the Ian O. Ihnatowycz Institute for Leadership at Ivey. Led by Ivey Professor Gerard Seijts, the Institute will focus on researching business leadership issues, developing teaching tools, and creating opportunities to showcase Ivey’s excellence in leadership. Their donation supports a Chair in Leadership and operational funding for the Institute. The gift qualified for $1.5 million in matching funds for the Chair from The University of Western Ontario, which increased the overall impact to $5 million.

Prompted by the research that culminated in the publication of Leadership on Trial: A Manifesto for Leadership Development, which concluded the root cause of the 2008 financial meltdown was a failure in leadership at a multitude of levels in corporations, governments, as well as with regulators and consumers themselves, Ihnatowycz wanted to build on the report’s proposals for preparing future leaders by launching an institute that could implement such ideas. In particular, Ihnatowycz was struck by the emphasis in Leadership on Trial on the importance of leadership character.

“Competencies determine what people CAN do—leadership character determines what they WILL do. Leadership character needs to be nurtured and developed. The Institute will help students with strong leadership aspirations to be better prepared for the challenges ahead and to exhibit professionalism and character,” he says. “The timing is perfect because of what has been happening in the business community. I’ve seen leadership failures and I felt compelled to do something.”

While Ivey has a long history in developing leaders, Ihnatowycz says he hopes the Institute will help to further cement Ivey’s position as one of the world’s top leadership schools.

“Having spent some time in leadership roles myself, I can appreciate how difficult it can be and how many challenges one has to surpass to achieve any level of success,” says Ihnatowycz. “Ivey has demonstrated vision and leadership in recognizing that change was needed to better prepare students for their future leadership responsibilities.”

Dean Stephenson says the School is proud to bear the Ihnatowycz name on its new leadership institute.

“Ian is a passionate leader with a company that models the kind of organizational culture that the Institute strives to promote.”

Dean Carol Stephenson, O.C.

“The timing is perfect because of what has been happening in the business community. I’ve seen leadership failures and I felt compelled to do something.”

Ian Ihnatowycz, MBA ‘82

CamPAIGN FOR LEADERSHIP
Gifts in action

IvyE Alumni have always played a critical role in the School’s growth through their commitment of time, insights and financial resources. Here, we tell the stories of just two of the generous gifts received in 2010 and give heartfelt thanks for the extraordinary generosity from alumni, friends and corporations, who are driving Ivey’s success.

IAN IHNATOWYCZ, MBA ’82
President, CEO and Founder, Acuity Investment Management Inc.
Challenging alumni study groups to give back
When the new Ivey building eventually opens for classes it will hold a legacy from Bob Gibson, MBA ’87, and Paul Moynihan, MBA ’92.

One of the study rooms in the new building will bear the name Mustang Capital after the investment firm that Gibson, Moynihan and fellow Ivey alumnus Stephen Peacock, MBA ’82, launched in Calgary in 2002. Mustang Capital has now been folded into Rothschild Canada, an independent financial advisory firm led by Ivey graduate David Drinkwater, HBA ’70. Moynihan and Gibson are now Managing Directors for Rothschild’s Calgary office, but the Mustang Capital name will live on at Ivey. Peacock retired from Mustang Capital in 2008.

“The name came from the Western Mustangs. It was what we all had in common—we were all Ivey graduates,” says Gibson. “Making a contribution toward a study room was the right feel for us. The students that will use it are going to work together for at least one or two years in a tight-knit small group and do some pretty cool things—that’s the same kind of thing that we experienced at Mustang Capital.”

Although Gibson and Moynihan attended Ivey at different times and met while working together at TD Securities, they both have memories from their study groups and they encourage Ivey alumni with similar sentiments to follow their lead.

“We’re throwing out a bit of a challenge,” says Gibson. “If other alumni keep in touch with members of their study groups, they should get together to do the same. We’ve even suggested it to some of our competitors that have Ivey graduates on their teams.”

While acknowledging the dire need for the new space at Ivey certainly prompted their gift, it was also meant as a way to thank Ivey for the contribution it made to their lives.

“Ivey has had quite an impact on me as to where I've ended up career-wise and otherwise. I figured if we are talking the talk about what the School has meant to us, we had better walk the walk and that resulted in our gift,” says Gibson.

Moynihan adds that his Ivey education was a factor in his switch to entrepreneurship and Mustang Capital wouldn’t have existed otherwise.

“Having a new facility that is modern and can attract the best students and faculty, and bring HBAs and MBAs together in the same building is significant.”

2010 ANNUAL REPORT / 57
He is warmly remembered by the faculty, staff, alumni, and friends of Ivey as a visionary and strategic leader who was fearless in the face of unprecedented change, and passionate about the critical role of business education for Canada’s future.

In re-branding the School and embracing internationalization, he set Ivey on a path to global prominence. As a leader he was defined by passion, courage and commitment, but for those closest to him, he will live on in their hearts as an inspiring teacher, storyteller and mentor.

Tapp made his mark in the corporate world in 1985 when he led the leveraged buyout of the global Lawson Mardon Group. After retiring from the company, Tapp was encouraged by Earl Orser and Richard M. Ivey, HBA ’47, to come to the Business School. Early in his tenure he led Ivey and the rest of Ontario’s business schools through the deregulation of tuition for graduate and undergraduate programs, a massive change that lessened the School’s dependence on government funding and allowed Ivey to chart its own destiny.

Tapp also oversaw the branding of the School with the Ivey name, expansion of the HBA and PhD programs, the launch of Ivey Hong Kong, and the growth of the research program. But the accomplishment he was most proud of was reconnecting the School to its powerful global alumni network. He once referred to alumni as “the backbone of the School.”

“Under Larry the School’s relationship with its alumni was solidified, making a lifelong connection,” says Glenn Yonemitsu, MBA ’89, former Executive Director, Ivey Advancement and currently CEO, Canadian Association of Management Consultants. During Tapp’s tenure, the Ivey Alumni Association Board of Directors was formed, Ivey Advancement grew, the Ivey Campaign raised more than $78 million, and the Ivey Distinguished Service Awards were launched.

Tapp’s greatest talent was his ability to inspire others to reach higher. Trevor Hunter, MBA ’97, PhD ’05, served as Tapp’s teaching assistant in his popular course on corporate governance. “Everyone will remember Larry for his leadership as a dean and a businessman,” says Hunter. “I will remember him that way too, but it is how he supported and inspired me when I needed it most that I will never forget.”

During his final days as Dean, Tapp was asked what he thought Ivey could achieve in the years ahead. He replied simply: “The future is whatever we want it to be. We’re as good as anybody else—it’s just a matter of how much we care and how hard we want to work.”
Larry Tapp Remembered

I will remember Larry as a Dean who fundamentally changed our Business School in many ways—we owe him a great debt.
—Paul Davenport
Former President and Vice Chancellor, Western

Larry [had] great business qualities: intelligence, instinct, vision, ambition, energy, resilience, adaptability. And, best of all, he was superb with people because he truly cared about them.
—Gilles Lamoureux, MBA ’66
Ivey Advisory Board member

Larry brought a fresh and exciting vision and leadership approach to Ivey and led the School to a new prominence—more global, more innovative, more market focused and more in touch with the business community and our alumni.
—Larry Wynant, MBA ’72
Associate Dean, Asia during Larry’s tenure

He understood the absolute importance of being where the action was. It is highly doubtful that Ivey would today have a campus in Hong Kong if not for Larry Tapp’s unwavering support and leadership.
—Paul Beamish, HBA ’76, PhD ’85
Director, Asian Management Institute and Engaging Emerging Markets Research Centre

Larry was always ahead of the curve. He initiated Board Director education ten years before the industry saw the need for well-educated and prepared Directors.
—Ron Charles, MBA ’71
Ivey Advisory Board member

It was his infectious enthusiasm and vision for Ivey that motivated me to get actively involved with the Advisory Board. He had that effect on everyone. It is why the Ivey Brand was so greatly enhanced during his tenure.
—Chris Matthews, MBA ’72
Chair of the Ivey Advisory Board from 2001-2004

Larry’s leadership in moving Ivey to the international stage was the key to growth of all Canadian business schools. But it was his integrity and values in life that left the most lasting impression on me.
—John Irwin, CFO, CIO, Director of Facilities
Vice President of The Ivey Group of Companies
2010 Ivey Highlights

January

**MBAs win investment banking competition**

Ivey’s MBA students topped 20 MBA teams across Canada for their investment banking pitch at UBC’s 1st National Investment Banking Case Competition.

**Ivey student named champion entrepreneur**

HBA student, Greig Perantinos, owner of Cool Moose Creamery, was named the 2010 Student Entrepreneur Ontario Champion by Advancing Canadian Entrepreneurship.

**Ivey student honoured for activism**

HBA student, Rani Suleman, was one of eight Ontarians to be recognized by the Ontario Council for International Cooperation and the Canadian International Development Agency (CIDA) for her efforts in pursuing global justice.

February

**Dean blogs Olympic experience**

As a Director of the Vancouver Olympics Committee, Dean Stephenson shared experiences, insights and observations from the 2010 Olympic Winter Games via the “Ivey at the Olympics” blog.

**Ivey forum proposes new food and health policies**

More than 80 policy-makers, researchers and industry leaders gathered at Ivey on March 29-30 to create an action plan for developing and adopting healthy food practices. The forum was hosted by Ivey’s Lawrence National Centre. The resulting report, Food and Health 2010: Advancing the Policy Agenda, was produced by Professor David Sparling and identified six priorities for a Canadian Food Strategy.

March

**PRIME MINISTER HARPER VISITS IVEY**

Dean Stephenson hosted Prime Minister Stephen Harper in a roundtable session on March 25 for southwestern Ontario business and community leaders to discuss Canada’s Economic Action Plan.

**Annual Scotiabank case competition**

The 21st Annual Scotiabank Case Competition attracted teams from 11 countries, including Brazil, Korea, New Zealand, Norway, Singapore and Thailand.

April

**Ivey forum proposes new food and health policies**

More than 80 policy-makers, researchers and industry leaders gathered at Ivey on March 29-30 to create an action plan for developing and adopting healthy food practices. The forum was hosted by Ivey’s Lawrence National Centre. The resulting report, Food and Health 2010: Advancing the Policy Agenda, was produced by Professor David Sparling and identified six priorities for a Canadian Food Strategy.
May

Ivey partners with Indian Institute of Management Bangalore (IIMB)
Dean Stephenson signed a MOU on May 24 with the IIMB to create new opportunities for joint research projects, exchanges, and international conferences in India and Canada.

June

The Ivey Coca-Cola China Case Competition was held at the Canadian Pavilion of World Expo Shanghai, drawing more than 500 teams from 18 universities.

September

Ivey Coca-Cola China case competition in Shanghai
The Ivey Coca-Cola China Case Competition was held at the Canadian Pavilion of World Expo Shanghai, drawing more than 500 teams from 18 universities.

Ivey launches Campaign for Leadership
Ivey kicked off its fundraising campaign, Campaign for Leadership: Stepping Up for the Next Generation, with news that it had received a $1.3 million boost from Great-West Life, London Life & Canada Life and Power Financial Corporation.

Ivey launches Leadership on Trial report
A nine-month research project exploring leadership before, during and following the economic crisis culminated with the launch of Ivey’s groundbreaking report, Leadership on Trial: A Manifesto for Leadership Development.

Ivey launches Ian O. Ihnatowycz Institute for Leadership
On September 21 at the Leadership on Trial report launch, Ivey announced the formation of the Ian O. Ihnatowycz Institute for Leadership following a generous gift from Ian Ihnatowycz MBA ’82, and Marta Witer. The $3.5 million gift from Mr. Ihnatowycz and Ms Witer was matched by a further $1.5 million from Western.
October
Ivey alumni reconnect for homecoming

More than 950 Ivey alumni returned to Ivey Oct. 1-3. During the event in the tent, Sylvia Chrominska, HBA ’75, David Cornhill, MBA ’80, and Paul Sabourin, MBA ’80, received the Ivey Distinguished Service Award.

November
Stephenson receives Order of Canada
Carol Stephenson was one of 40 Canadians to receive the Order of Canada. She was lauded for her contributions to the technology sector, and for her efforts to advance business education.

HBAs win international competition in Hong Kong
Ivey’s HBA team finished first in the prestigious Hong Kong University of Science & Technology (HKUST) Case Competition, against 18 competing schools from the U.S., Europe and Asia.

December
MBA international study in China and India
Ivey’s MBAs and EMBA students participated in the 2010 International Study Trip, with 84 students visiting China (Hong Kong, Shanghai, Beijing) and 32 students visiting India (Dubai, Mumbai, Bangalore, and Delhi).
Our New Building Rises

Ivey’s new building steadily took shape throughout 2010, with construction only temporarily slowed by a snowstorm that closed down most of Western and the City of London for three days in December. Students, faculty and staff are looking forward to beginning the migration across Western Road to their new home with the official opening of Phase 1 planned for Fall 2011, thanks to a $50 million investment provided jointly through the Federal Government’s Knowledge Infrastructure Program and Ontario’s 2009 Budget as part of efforts to help modernize facilities and boost long-term research and skills training capacity at provincial colleges and universities.
