FOR IMMEDIATE RELEASE

Wall Street Journal honors Thunderbird Professor

(GLENDALE, Ariz.) Dec. 9, 2010 — Thunderbird School of Global Management Professor Andreas Schotter, Ph.D., has been selected as a “WSJ Distinguished Professor of the Year, 2010.”

Prof. Schotter is an award-winning and highly accomplished scholar whose thought-leadership and expertise has been tapped by top global companies. The award, which is given by The Wall Street Journal-In-Education, recognizes Prof. Schotter for the impactful use of discipline-specific articles and topical discussion questions from WSJ and WSJ.com, to keep lessons fresh and relevant for his students. The Wall Street Journal recognizes only 10 Professors nationwide with this prestigious award. Prof. Schotter is highly effective at helping students understand global strategy, emerging markets, and multinational corporations, according to Thomas Cook, WSJ Regional Education Representative. “Professor Schotter has a talent to maximize the power of digital media platforms directly into the classroom, and helps his students prepare for their careers by conducting high-level media research.” Cook said.

About the award Schotter says: “In today’s fast paced global business environment with instant Internet everywhere it is a critical managerial skill to access the most reliably information quickly and comprehensively. Too often Google, Facebook, Twitter, or other social media platforms are being falsely regarded as sufficient for researching current events, trends, or other data. Successful leaders need to resist an overreliance on these, though somewhat interesting, but often not very deeply researched news flashes. In my opinion, the WSJ and WSJ.com represent an extremely comprehensive and trustworthy information platform essential for high impact decision-making. Based on my own long-term global leadership experience and my scholarly work, no other similar media outlet has the editorial and journalist horsepower that the Wall Street Journal represents. It is quite amazing, after only a few sessions one can actually see the positive results in the classroom.”

Prof. Schotter was recently appointed a visiting professor at the prestigious Nordic Network for Climate Adaptation, Mitigation, and Economic Policy (N-CMAEP), a think-tank that promotes new interdisciplinary climate strategy research.

Before embarking on an academic career, Prof. Schotter was a senior executive with several multinational corporations in the automotive, industrial equipment, and consumer goods industries. He was the Asia-Pacific Regional Managing Director of Bitzer International, a world leading commercial refrigeration equipment manufacturer from Germany, and he worked for the Lancaster Group, Linde AG, and Volkswagen AG. As an entrepreneur, he jointly owned and operated a manufacturing business in Australia together with a Chinese partner. He has consulted globally with for profit and not for profit organizations in the manufacturing, retail, healthcare, renewable energy, and service industries.

Prof. Schotter’s primary research interests are multinational corporate development and subsidiary evolution, corporate strategic change, global innovation and technology management and emerging markets. His thesis research examined headquarters-subsidiary conflicts in multinational corporations. On the teaching side, he applies highly innovative and experiential pedagogical methods in Thunderbird’s MBA and executive development programs that enable participants both, to gain cutting-edge management knowledge and to develop strong critical thinking skills.
Dr. Schotter has a Masters in Economics and Business Management from the University of Kassel, Germany. He earned a MBA and Ph.D. from the Richard Ivey School, University of Western Ontario, Canada. He has taught at the University of Western Ontario and at McMaster University, before joining Thunderbird. At Thunderbird, Dr Schotter strives to develop boundary-spanning capabilities in future leaders that will enable these leaders to achieve sustainable prosperity worldwide.

**About Wall Street Journal**
The *Wall Street Journal* remains the number one newspaper in the U.S., according to the latest figures released today from the Audit Bureau of Circulation (ABC). *The Journal* leads all daily newspapers in total paid circulation, rising 1.8% to 2,061,142 (September 2010) from 2,024,269 (September 2009), as filed with ABC, subject to audit. *The Wall Street Journal* franchise continues to expand globally to serve readers with more content and new offerings.
