## An Underappreciated Value Investing Technique

#### **Event Driven Investing**

## **Event Driven Investing**

## Arbitrage

## Work-Outs

## **Risk Arbitrage**

### They are all the same thing.

- Pursuit of profits from <u>announced</u> corporate events
- Mergers, recapitalizations, spin-offs, liquidations, reorganizations, self tender offers, etc.
- Evaluation based on probability of events occurring, time, upside, downside
- We expect to profit regardless of the behaviour of the stock market in most circumstances

"These are securities whose financial results depend on corporate action rather than supply and demand factors created by buyers and sellers of securities. In other words, they are securities with a timetable where we can predict, within reasonable error limits, when we will get how much and what might upset the applecart. Corporate events such as mergers, liquidations, reorganizations, spin-offs, etc., lead to work-outs."

Buffett Partnership Letter, January 24, 1962

"Since World War I the definition of arbitrage – or "risk arbitrage," as it is now sometimes called – has expanded to include the pursuit of profits from an announced corporate event such as sale of the company, merger, recapitalization, reorganization, liquidation, self-tender, etc. In most cases the arbitrageur expects to profit regardless of the behavior of the stock market. The major risk he usually faces instead is that the announced event won't happen."

"To evaluate arbitrage situations you must answer four questions: (1) How likely is it that the promised event will indeed occur? (2) How long will your money be tied up? (3) What chance is there that something still better will transpire – a competing takeover bid, for example? And (4) What will happen if the event does not take place because of anti-trust action, financing glitches, etc.?"

#### Event Driven Investments - Summary

#### Benefits

- Returns depend on transaction completion and not on movement in equity markets
- Most transactions are uncorrelated with each other
- Short completion times lead to cash availability
- Multi-strategy benefits adds another page to our "investment playbook"
- Good information availability and transparency

#### **Event Driven Investments - Summary**

#### Risks

- Transactions can break for many reasons
  - Financing issues
  - Shareholder rejection
  - Regulatory concerns
  - Anti-trust approvals
  - Material Adverse Event
- Any single transaction is a binary event
- A good batting average is required
