Business 9882 – Special Topics in Management Science: Applications of Statistical Analysis

Winter 2021

Fredrik Odegaard
Office No. 2336
Tel. Number 519-661-4278
fodegaard@ivey.uwo.ca

Faculty Assistant: Stacey Erdie
Office No. 3350-A
Tel. Number 519-661-3494
serdie@ivey.ca

Tuesdays 8:00 am – 11:00 am
Location: Zoom
(12 Sessions)

INTRODUCTION TBD

COURSE DESCRIPTION
This course will cover graduate level research articles involving either fully or partially empirical analysis.

COURSE OBJECTIVES
The design of this course is to introduce students to a range of statistical analysis used to solve or analyze real world phenomena and problems. The objective is to provide students an appreciation for: (i) what makes problems/phenomena interesting from a research and practical perspective; (ii) how to decide on the appropriate type of statistical methodology to apply to a given problem; and (iii) how to interpret the real world relevance and insight from the statistical analysis.

The focus of the course is on the application of the statistical analysis and not on the theoretical developments or foundations of the statistical frameworks discussed. However, some discussion on the statistical theory is expected to be included. Each class centers on one article to allow for a deep and rigorous discussion. Students are expected to do extensive research around each articles and provide insights beyond what is stated in the articles.

COURSE ACTIVITIES / GRADING / METHODS OF EVALUATION / EXPECTATIONS / CLASS CONTRIBUTION / ATTENDANCE

Class Contribution (50%) – Depending on class-size each student will lead 1-2 class discussions. Students are expected to come fully prepared and contribute to the discussion of the paper.
Final Term Project (50%) – Students will conduct an individual final project. The objective is to find a data-set of interest and conduct a sound and rigorous statistical analysis. Students will provide two interim presentations – a Descriptive and a Predictive Analytics – and one final presentation, and submit a final term paper. Details provided in class.

MATERIALS / REQUIRED READING
The course centers on a set of published research articles from journals within Management Science, Statistics and Econometrics. See list below. No formal text-book is provided. Students are expected to find and read any relevant technical background they need to understand the articles.

COURSE SCHEDULE / SESSION PACKS
The tentative schedule is listed below.

LEARNING TOOLS AND RESOURCES
Western libraries should have any text-book required to understand the background information covered in the articles.

ACADEMIC OFFENCES: PLAGIARISM AND ACADEMIC INTEGRITY
Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site: http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_grad.pdf

All required papers may be subject to submission for textual similarity review to the commercial plagiarism-detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (http://www.turnitin.com).

SUPPORT SERVICES: HEALTH AND WELLNESS
Students who are in emotional/mental distress should refer to Mental Health@Western http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of options about how to obtain help.

As part of a successful graduate student experience at Western, we encourage students to make their health and wellness a priority. Western provides several on campus health-related services to help you achieve optimum health and engage in healthy living while pursuing your graduate degree. For example, to support physical activity, all students, as part of their registration, receive membership in Western’s Campus Recreation Centre. Numerous cultural events are offered throughout the year. Please check out
the Faculty of Music web page http://www.music.uwo.ca, and our own McIntosh Gallery http://www.mcintoshgallery.ca. Information regarding health- and wellness-related services available to students may be found at http://www.health.uwo.ca.

Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable confiding in, such as their faculty supervisor, their program director (graduate chair), or other relevant administrators in their unit. Campus mental health resources may be found at http://www.health.uwo.ca/mental_health/resources.html.

STUDENT ACCESSIBILITY SERVICES

Western is committed to achieving barrier-free accessibility for all its members, including graduate students. As part of this commitment, Western provides a variety of services devoted to promoting, advocating, and accommodating persons with disabilities in their respective graduate program.

Graduate students with disabilities (for example, chronic illnesses, mental health conditions, mobility impairments) are encouraged to register with Student Accessibility Services, a confidential service designed to support graduate and undergraduate students through their academic program. With the appropriate documentation, the student will work with both SAS and their graduate programs (normally their Graduate Chair and/or Course instructor) to ensure that appropriate academic accommodations to program requirements are arranged. These accommodations include individual counselling, alternative formatted literature, accessible campus transportation, learning strategy instruction, writing exams and assistive technology instruction. For more information, see http://www.sdc.uwo.ca/ssd
